Today's globalization under the circumstances age generation national in spirit educate them conscious activity development important from tasks one is considered Especially the beginning education in the phase of students spiritual and moral worldview in formation national spiritual from inheritance effective use important importance profession Because at this very time your child thinking , attitude and personal qualities shaped begins.

National spiritual inheritance of the people centuries during collected spiritual wealth is , then of the people history , traditions , values , national thinking and moral views embodied . From this heritage education in the process use in students national pride , patriotism and humanitarianism feelings to shape service does .

National spiritual inheritance concept and his/her educational importance

National spiritual inheritance is of the people historical development during created spiritual wealth , values and traditions is complex . To him people verbal creativity samples , great of scientists scientific and educational heritage , national customs and traditions and traditions enters.Primary class their students in upbringing following spiritual inheritance examples important to the point owner :

- proverb and proverbs ;
- fairy tales ;
- epics ;
- national customs and traditions ;
- great ancestors life and activity ;
- national holidays and values .

These tools children's thinking circle expands , moral concepts enriches and conscious the relationship In particular , Alisher Navoi's " goodness" to do " , " morality " , " science about " getting " ideas students in upbringing important place It catches .

Beginning class students conscious activity pedagogical foundations of formation

English: activity is human to the environment relatively understood relationship , independent thinking and active movement to do is the ability . Primary class in their students conscious activity in formation education and upbringing process compatible in case organization being necessary .

Pedagogical perspective out of sight following factors important is calculated as :

1. Student's age characteristics to account to take ;
2. National to values leaning education environment creation ;
3. Interactive from methods use ;
4. Students independent to think teaching ;
5. National inheritance vital examples with to tie .

Today's " Smart " day attack ", "Cluster", "Blitz survey ", " Rolly games like " technologies national content based on is being used .

National spiritual from inheritance use of technologies exists condition

Current in time general education in their schools national spiritual from inheritance to use big attention is being directed . Textbooks to the content national values , people verbal creativity and ancestors legacy with related topics included .

Especially :

- mother tongue;
- to read literacy ;
- upbringing ;
- etiquette ;
- technology

in the sciences national in content from materials wide is being used .

However analyses that shows that some in cases national spiritual from inheritance use only theoretical information to give with limitedly remains To practical activity directed innovative technologies enough to the extent not in use .

Therefore following in directions the works reinforcement to the goal suitable :

- electron education resources creation ;
- multimedia from the means use ;
- national to values based trainings organization verb ;
- parents and school cooperation strengthening ;
- people pedagogy elements integration into lessons .
